

DEPE TOKEN

COOKIE POLICY

COOKIE POLICY

INTRODUCTION

This here's the Cookie Policy for DepeToken.com ("We", "Our", "Us") - a set of rules for how we handle cookies when you visit our domain at www.DepeToken.com (the "Territory").

WHAT ARE COOKIES

Picture cookies like the Don's little messengers – tiny files we slip onto your device to ensure your visit runs smooth. Like any well-run operation, these cookies help us collect useful intel, improve your experience and remember your preferences. But hey, if you decide to block the cookies, some of the perks and functionality of the site might not work as well. Your call, boss.

HOW WE USE COOKIES

The Cartel uses cookies for a variety of jobs - outlined below. Disabling them? Well, that's like tying one hand behind your back. It'll likely mess with how things run around here. Our advice? Keep 'em enabled unless you're sure you can do without what they bring to the table.

DISABLING COOKIES

Not a fan of our little messengers? No problem - you can call them off by tweaking your browser settings. Dig into your browser's help files for instructions. Just a heads-up: blocking cookies could make some features on this site (and others) act up. Don't say we didn't warn you!

THE COOKIES WE SET

Here's what our cookies may be used for:

- ❖ Site Preference Cookies: The Cartel remembers how you like things - language, layout, and the works. These cookies smooth your path the next time you visit the site.
- ❖ Form Submission Cookies: Fill out a form for contact or registration? These cookies make sure we remember your details for next time.
- ❖ Subscription Cookies: If you sign up or (or unsubscribe) for any services, these cookies help us manage your notifications.

THIRD-PARTY COOKIES

Sometimes, we work with trusted allies to get the job done. Here's a breakdown of the third-party cookies you might come across:

- ❖ Google Analytics: We use this to gather intel on how you navigate the Territory. It tracks things like how long you stick around and which pages catch your eye. If you're curious, check out the official Google Analytics page for more details.
- ❖ Third-Party Analytics: Other analytics tools may help us measure traffic, engagement, and your journey across the site. This intel makes us better at what we do.
- ❖ Advertising Cookies: Every now and then, cookies from ad networks like Google AdSense may show you some relevant ads and limit how often they appear. All part of keeping things smooth and tailored.

NEED MORE INFO?

Still unsure about cookies? It's usually safer to leave them on - they're often essential for the operation of the Cartel's Territory. For more on managing cookies, check your browser's documentation.
